

15 December 1959

MEMORANDUM FOR: Director, Photographic Intelligence Center

SUBJECT: PIC Spaces in the New Building.

REFERENCE: Attached Plan submitted earlier

25X1

1. [] Building Plans Office, Room 1211 R & S Building requested that a representative from PIC come over to R & S to discuss the space allotments for PIC in the new building. The total area being planned for is about 2500 square feet. This includes a mailing room, two individual office spaces, PI room for five analysts and a combination PI Cell briefing room of about 1000 square feet. The area is tentatively located on the fifth floor of the tower in a secure area (meaning protected by ultrasonic alarm and combination locks, grills on the windows, etc. with one vault which is a large mosler type reinforced concrete and steel storage area). The area in question is behind the "barrier".

2. There were no disagreements on basic plan submitted except that the column spacing is at 20 foot intervals which will require some lateral compression and lengthening of the original plan.

[] is sending forms to PIC on the electrical requirements, air conditioning, humidity and dust control features, etc. Essentially the requested space and facilities will be provided.
